HP ServeIT for IT infrastructure

HP Flex-Bundles First Server Solutions with Microsoft

The power of HP ProLiant Gen8 server technology combined with Microsoft Windows Server 2012 R2 creates an ideal first server solution—no matter where you are on your IT journey.

What could HP and Microsoft do for you?

Enhanced efficiency and collaboration

Centralize, organize, protect, and access your applications and information from almost anywhere on almost any device.

Simplified management

HP ProLiant Gen8 servers include easy-to-use online tools for you to monitor and manage your entire environment.

One contact for sales and support

Your authorized HP reseller can deploy and support the entire solution.

Deployment confidence

Get the benefit of our carefully crafted and predefined—yet flexible—configurations so your solution performs as expected.

Your ideal first server solution

Server-based computing can improve your productivity by enhancing accessibility and simplifying IT management. But what you need in a first server solution depends on where you are with your business—and your business IT. Whether you're taking your first steps as a business, building some real momentum, or preparing for major business growth, HP and Microsoft® have a first server solution that's sized just right for where you are—and where you want to go.

Where are you now?

Starting out

If you're just starting out you need to make the most of limited space and resources. The HP ProLiant MicroServer Gen8 with Microsoft delivers more compute power in a form factor that fits easily into even a home office, simplifies information access, and still keeps deployment and management simple. It is the ideal package for collaboration, centralization, and command of a small, remote/branch office or home-based business.

Building momentum

At this stage, increasing compute power while improving efficiency is a key step toward getting ready for what lies ahead. The HP ProLiant ML310e Gen 8 v2 Server doubles the memory capacity of the HP MicroServer Gen8, and provides the essential availability and room for expansion needed to accommodate rapidly changing business needs. And Microsoft Windows® Server 2012 R2 helps keep teams connected, enabling a modern, mobile, and more-efficient work style.

How can we help you get to where you want to be?

Starting out

Server	(1) HP ProLiant MicroServer Gen8
Networking	(1) HP PS1810-8G Switch
Software	(1) Windows Server 2012 R2 Essentials ROK
Management	HP Integrated Lights-Out 4 Standard (HP iLO 4)

Building momentum

(1) HP ProLiant ML310e Gen8 v2 Server
(1) HP PS1810-24G Switch
(1) Windows Server 2012 R2 Essentials ROK
HP iLO4

Business expansion

(1) HP PS1810-24G Switch
(1) Windows Server 2012 Essentials ROK
HP iLO4

Note: Configuration and availability may vary by region

Business expansion

When you're growing fast, you need a solution that delivers both the performance and scalability you need to take your business to the next level. The HP ProLiant ML350e Gen8 v2 Server features a unique architecture and flexible deployment options that allow you to scale to two CPUs and up to 192 GB of memory for optimized price/performance as you expand. At the same time, Windows Server 2012 R2 provides the functionality you need now, and is ready to scale all the way to virtualization and the cloud when you are ready.

Our solution partners

Let's take the next step together

HP and Microsoft have joined together to create a portfolio of first server reference configurations designed for the needs of growing businesses like yours. These complete packages include everything you need to get started with server-based computing, quickly and affordably.

Together HP and Microsoft help you accelerate your IT infrastructure journey with simple solutions that are predefined yet flexible so you can choose a solution that meets your needs today and is ready to grow along with your business.

The right solution for every phase of your business

HP ServeIT includes predefined solutions designed to help solve challenges and reduce complexity as your business grows. HP Flex-Bundles First Server Solutions with Microsoft are built on:

HP ProLiant Gen8 servers

To effectively respond to IT challenges, you need smarter systems that can learn, connect, and adapt. HP ProLiant Gen8 servers

incorporate user-inspired innovations to drastically reduce the time you spend on mundane IT tasks—freeing your time and resources for innovation.

Windows Server 2012 R2

Windows Server 2012 R2 is a 64-bit operating system that enables you to centralize, organize, protect, and access your applications and information from almost anywhere on almost any device.

The time is now

Now there's no need to accept technology that's too small to get the job done or more of an investment than you need to run your business. And there's no need to put off the added benefits of a server to improve collaboration, simplify IT management, and get you ready for what lies ahead. An HP ProLiant Gen8 server with Microsoft Windows Server 2012 R2 is your ideal first server solution.
