Your ideal email solution

Microsoft® Exchange Server 2013 on HP ProLiant Gen8 servers powered by Intel processors, is a predefined business email solution that can improve your productivity by enhancing accessibility to email, calendars, and contacts while simplifying IT management. But what you need in a business email solution depends on where you are with your business—and your business IT.

Whether you're taking your first steps as a business, beginning to build some momentum, or preparing for major business growth, HP and Microsoft have a business email solution that's sized just right for where you are—and where you want to go.

Where are you now?

If you are one of the 80 percent of businesses that require an on-premise solution because of regulations, sensitive data, or very high volume email-generating applications, then this solution is perfect for you.

HP ServeIT Flex-Bundles consist of predefined configurations so you can choose the solution that is sized just right for your business.

Starting out

Don't let limited IT experience and budget hold you back from putting in place the communication tools your team needs to perform at its best. HP Flex-Bundles for Microsoft Exchange Server 2013 are easy to deploy and maintain, user-friendly, and have plenty of room to grow up to 500 mailboxes.

Building momentum

When you're hitting your stride, you don't want anything to slow you down. Enhancing productivity is key in this phase of business growth. HP and Microsoft help you streamline communications with a solution that delivers intelligent, automated monitoring and management to reduce the burden on IT and lets you focus on the road ahead with support for 500–1,000 mailboxes.

How can we help you get where you want to be?

*Microsoft Exchange Server 2013 licenses are sold separately. Configuration and availability may vary by region.

Business expansion

When you're growing fast, you need to invest in IT solutions that offer advanced features and the ability to grow with you. HP Flex-Bundles for Microsoft Exchange 2013 feature a building block model that simplifies deployments at all scales, standardizes high availability and client load balancing, and improves cross-version interoperability. They also incorporate advanced features at the server and software level that enhance uptime and allow you to support multiple databases per volume. And the solution can scale to support 1,000 mailboxes with ease.

Let's take the next step together

HP and Microsoft have joined together to create business email reference configurations designed for the needs of growing businesses like yours. These Microsoft Exchange-ready configurations include everything you need to get started with business email—or upgrade your existing solution—quickly and affordably.

Our solution partners

Together, HP and Microsoft help you accelerate your IT infrastructure journey with simple solutions that are predefined, yet flexible enough to meet your needs today and are ready to grow with you tomorrow.

The right solution for every phase of your business

HP ServeIT includes predefined solutions designed to help solve challenges and reduce complexity as your business evolves. HP Flex-Bundles for Microsoft Exchange 2013 are built on:

The HP ProLiant Gen8 servers—

HP Flex-Bundles for Microsoft Exchange 2013 are built on powerful and efficient HP ProLiant servers, powered by the latest Intel® processors. HP ProLiant Gen8 server innovations reduce the time spent on IT tasks—freeing resources for innovation.

HP Storage—Low cost drives and efficient packaging of HP D-Series disk enclosures lead to low total cost of ownership, with choices for drive types based on performance and capacity needs. Controlled by the server and familiar Microsoft management tools, HP D-Series disk enclosures offer stress-free management for Exchange environments. As you expand and gain momentum in your Exchange environment, HP Modular Smart Array offers capabilities for expansion of connectivity, performance, and high availability.

Microsoft Exchange Server 2013—Microsoft Exchange Server 2013 helps to ensure your communications are always available while you remain in control with larger mailboxes and local archiving, along with built-in monitoring and managed availability.

The time is now

Now with HP Flex-Bundles you get the technology that is sized just right for where you are on your IT infrastructure journey. At the same time you'll gain the added benefits of a business email solution that will improve accessibility, enhance security, simplify IT management, and get you ready for what lies ahead. HP Flex-Bundles for Microsoft Exchange Server 2013 are your ideal business email solutions.
