

Brief

Manage and protect your business

HP ProLiant MicroServer Gen8 with McAfee SaaS Endpoint Protection

With HP and McAfee, your server—and your security—are perfectly tailored to support and protect your growing business. Get a free 30-day trial of McAfee security software with the purchase of an HP ProLiant MicroServer Gen8.¹

Micro sized, big possibilities

- **Revolutionize** how you share and collaborate
- **Centralize** valuable information and keep it secure
- **Adapt** to new opportunities and win more customers

Take it to the next level

How do you know if your business will benefit from a server? Are you hesitating due to a lack of IT expertise and staff required to install, configure, and maintain a server? How do you address security?

With the HP ProLiant MicroServer Gen8 and McAfee's Security-as-a-Service (SaaS) Endpoint Protection software, the complexity of a server has gone away and the benefits of a server with an industry-leading security solution are within your reach. Together, HP ProLiant MicroServer Gen8 with McAfee SaaS Endpoint Protection software let you take your business to the next level with confidence.

The right server

The HP ProLiant MicroServer Gen8 is a quiet, stylish server that's ideal for a growing business with 10 or less employees, or even a home office. It's easy to set up and configure right out of the box, while its small, quiet, and cool design allows it to fit nicely into any office—or home office—in style.

Now there's no need to accept technology that's too small to get the job done or more of an investment than you need to run your business. The HP ProLiant MicroServer Gen8 with a free 30-day trial of McAfee SaaS Endpoint Protection is your ideal first server solution.

¹ The McAfee security solution available for this free trial offer is McAfee SaaS Endpoint Protection. At the end of the trial period, you may elect to purchase a subscription to McAfee SaaS Endpoint Protection or upgrade to McAfee SaaS Endpoint and Email Protection or McAfee SaaS Endpoint Total Protection. McAfee allows you to protect as many as 10 computers, including the server, with this free trial offer. Only the HP ProLiant MicroServer Gen8 with Microsoft® Windows® Server 2012 and computers with Microsoft Windows operating system software are eligible to run the McAfee software included in this offer.

Easy setup

Everything you need
is built in

McAfee security

Essential protection from
viruses and other threats

Our technology partner

² Hardware warranty replacement for as long as you own the product, with next business-day advance replacement available in most countries and three-year 24x7 phone support. h17007.www1.hp.com/us/en/networking/support/warranty/index.aspx

With the HP ProLiant MicroServer Gen8, you can experience:

- **Worry-free management** – HP iLO (Integrated Lights-Out) Management Engine provides a comprehensive set of easy-to-use tools that supports the complete life-cycle of the server, from initial deployment, to monitoring and management of your server.
- **Strong performance that saves on power** – Get fast, simultaneous access to files with an Intel® processor and 2 GB of RAM (expandable to 16 GB) while saving on your energy bill with a low 150-watt power supply that helps you do more with less power.
- **Enhanced productivity, collaboration, and security** – Centralizing business files streamlines access while keeping your business data in one place, where it is easier to protect.
- **Simplicity and flexibility** – Seamless network connectivity, integrated management, and HP Lifetime Warranty 2.0² make this server easy to incorporate into your IT environment.

The right security software

McAfee SaaS Endpoint Protection is purpose-built for small businesses but delivers the same level of security used by McAfee's largest corporate customers.

Delivered over the Web, it is less expensive, more efficient, faster to deploy, and easier to manage than traditional on-premises solutions. In addition, your solution will be proactively managed by McAfee's team of security experts.

With this free trial offer you get layered security that protects up to 10 Microsoft Windows-enabled computers, including the server, along with:

- **A single, integrated solution** – McAfee SaaS Endpoint Protection detects and blocks viruses, spyware, spam, phishing schemes, and hacker attacks to safeguard all your systems. Plus, built-in Web security ratings warn about potentially dangerous websites, providing proactive protection without limiting online access.
- **Affordable security and support** – Once the free trial period is over, a single, low-cost annual subscription offers continuous protection, automatic security updates and upgrades, and around-the-clock technical support.
- **Streamlined security management** – SaaS Endpoint Protection is easy to install and maintain, and is managed by McAfee SecurityCenter, an online console that centralizes installation, configuration, reporting, and updates, enabling even remote users to easily receive the latest upgrades and protection.

Round out your solution with HP services and support

Get the support you need for your entire IT environment by choosing from a number of HP support options designed to address your unique business needs. To find the support service that is right for your business, talk to your authorized HP reseller.

The time is now

Now there's no need to accept technology that's too small to get the job done or more of an investment than you need to run your business. The HP ProLiant MicroServer Gen8 with a free 30-day trial of McAfee SaaS Endpoint Protection is your ideal first server solution.
