

HP ServeIT virtualization solutions for SMBs

HP Flex-Bundles for VMware vSphere with Operations Management

Complete, affordable packages with everything you need to get started—and keep moving—on your virtualization journey.

When business results count, count on HP

- Reduce application downtime by 30 percent
- Reduce diagnostics and problem resolution time by 26 percent
- Improve VMware capacity utilization by 40 percent and consolidation ratio by 37 percent

Meeting you on your virtualization journey

You know virtualization can help you reduce costs, improve application availability, and simplify IT management. But your next step in virtualization depends on where you are with your business—and your business IT. Whether you're taking your first steps toward a virtualized environment, are ready to expand current efforts, or are getting ready for some major business growth, HP and VMware have a virtualization solution that's sized just right for where you are today—and where you'll want to go tomorrow.

Where are you now?

Starting out with virtualization

If you're just starting to look into virtualization, you may be feeling cautious about limited experience and budget, and having little or no dedicated IT staff to help you out. But you know that virtualization can deliver more compute power in less space, reduce your footprint, and increase operational efficiency. You just need some help getting started.

Building virtualization momentum

If you already have some experience with virtualization, you may be eager to expand those benefits. Ramping up your virtualization efforts at this stage can help you reduce complexity, improve return on investment, and get ready for what lies ahead. But an IT environment without a long-term growth strategy paired with limited IT resources may leave you wondering what your next step should be.

Small- to medium-sized business (SMB)—and virtualization—expansion

When you're growing fast, it's easy to outpace your infrastructure, resulting in inefficient use of resources. Enhancing virtualization at this stage can help you break through bottlenecks, enhance reliability, and reduce complexity to take your business to the next level. Continuing investment in IT is essential to keep that momentum growing.

How can we help you get where you want to be?

Note: Configuration and availability may vary by region.

	Starting out	Building momentum	Business expansion
	Essential Core Tower RC	Essential Core High Availability (HA) Rack RC	Scalable Core HA Rack RC
Servers	(1) HP ProLiant ML350e Gen8 Server	(2) HP ProLiant DL360e Gen8 Servers	(3) HP ProLiant DL380e Gen8 Servers
Storage	Internal ProLiant Storage	(1) HP MSA P2000	(3) HP StoreVirtual vSphere Storage Appliances (VSAs)
Networking (optional)		(2) HP 2920-24G Switch	(2) HP 2920-24G Switch
VMware software	(1) VMware vSphere Essentials	(1) VMware vSphere with Operations Management	(1) VMware vSphere with Operations Management
Management software	HP Insight Control	HP Insight Control	HP Insight Control

Let's take the next step together

HP and VMware have joined together to create a portfolio of virtualization reference configurations (RCs) designed just for the needs of small and growing businesses like yours. These complete virtualization packages include everything you need to get started with virtualization, or expand your virtualization efforts, quickly and affordably.

Together HP and VMware help you accelerate your virtualization journey with simple solutions that are predefined, yet flexible so you can choose a solution that meets your needs today and is ready to grow with you tomorrow.

Our solution partners

vmware®

The right solution for every phase of your business

HP ServeIT includes predefined solutions designed to help solve challenges and reduce complexity as your business evolves. HP Flex-Bundles for VMware vSphere with Operations Management are built on:

HP ProLiant servers

To effectively respond to IT challenges, you need smarter systems that can learn, connect, and adapt. HP ProLiant Gen8 servers incorporate user-inspired innovations to drastically reduce the time you spend on mundane IT tasks—freeing your time and resources for innovation.

HP MSA P2000

Affordable HP MSA storage provides an efficient balance of scalability, reliability, and cost efficiency, delivering easy deployment, low management costs, and storage consolidation.

HP StoreVirtual VSA solutions

Get the storage performance needed to support more robust virtualized workloads. As your infrastructure grows, HP StoreVirtual VSA scales capacity and performance without disruption.

HP Flex-Bundles for VMware

VMware vSphere with Operations Management gives you operational insight into your virtual environment, providing you with improved availability, enhanced performance, and capacity utilization.

Trust the market leaders in virtualization and cloud to get it right

HP and VMware work together to help you realize the benefits of virtualization and cloud computing through joint development, testing, and performance engineering. As the market leaders in end-to-end virtualization solutions, HP and VMware work together closely to deliver the most comprehensive offerings that enable small businesses to the largest enterprises reduce the cost and risk of virtualizing applications critical to the business.
