

## Spark customers' interest in Aruba with up to 99% discount on UXI's F-series sensors!

Secure this special offer by purchasing 3-year or 5-year UXI subscriptions (Cloud + LTE)

You can drive incremental revenue through the sale of UXI subscription licenses in conjunction with the sell-out of the remaining Aruba UXI F-series sensors currently in stock in EMEA. Plus – additional future revenue is possible via subscription renewals.

### Aruba UXI

AI/Ops-powered Aruba UXI sensors provide precise insights into user experience and application performance by continuously monitoring and testing the network from a client perspective.

Purpose-built user experience sensors behave like clients. They connect to wired and wireless networks and perform customized tests including application (on premise and cloud) and network services. Aruba User Experience Insight is vendor agnostic. The ability to deploy the solution in any network (wired and/or wireless) delivers value for all customers, of any size, in any industry.

### Offer and eligibility

- This offer is available to customers purchasing 3-year or 5-year UXI Cloud + LTE subscriptions.
- Eligible customers get up to 99% discount on F-series sensors.

### Terms and conditions

- The offer cannot be combined with any other promotional offer.
- There are a small number of countries where this product cannot be sold due to product compliance reasons. Current eligible country list can be found [here](#).
- Selling motion: upfront only.
- Two bundles will be made available: the 3-year and 5-year subscription.
- The offer is valid until 31st January 2022 or until stocks last.
- Aruba and HPE reserve the right to terminate, alter, or modify these terms and conditions at any time.

R4X02AAE	Aruba 5 Yr UXI LTE Subscription E-STU

## Start the conversation today

CUSTOMER PAIN	PITCH
Customers make an excessive investment to achieve optimal performance of their network.	Deploying UXI helps customers to efficiently measure the network performance and its shortcomings.
Critical application troubleshooting is complicated in a SaaS environment. There is no way to validate failures.	UXI provides real time validation of performance and availability of web applications.
Rapid network changes and limited onsite support options create an almost immediate truck roll and prevent the ability to pinpoint Wi-Fi, network, server or Internet related issues.	UXI is your remote support person. UXI correlates and compares application, network and authentication issues, spotting anomalies and reducing escalations.
Understanding network health as related to application performance is needed for a positive digital experience.	UXI provides the baselining, trending, and analytics to ensure that you are providing a positive digital experience.
IT Teams are measured daily by the business to resolve network performance issues. MTTI is an exhaustive exercise.	UXI identifies abnormal network behaviour real time for quick NOC resolution. Turn your NOC into a Hero.
